

## PART I: PROBLEMS

|   |  |    |
|---|--|----|
| 1. Mechanics .....  |  | 3  |
| 1.1. Falling Chain ( <i>MIT, Stanford</i> ).....  |  | 3  |
| 1.2. Cat and Mouse Tug of War ( <i>Moscow Phys-Tech, MIT</i> ) .....                                      |  | 3  |
| 1.3. Cube Bouncing off Wall ( <i>Moscow Phys-Tech</i> ).....  |  | 4  |
| 1.4. Cue-Struck Billiard Ball ( <i>Rutgers, Moscow Phys-Tech, Wisconsin-</i><br><i>Madison (a)</i> )..... |  | 4  |
| 1.5. Stability on Rotating Rollers ( <i>Princeton</i> ).....  |  | 5  |
| 1.6. Swan and Crawfish ( <i>Moscow Phys-Tech</i> ) .....  |  | 6  |
| 1.7. Mud from Tire ( <i>Stony Brook</i> ) .....   |  | 7  |
| 1.8. Car down Ramp up Loop ( <i>Stony Brook</i> ) .....   |  | 7  |
| 1.9. Pulling Strings ( <i>MIT</i> ) .....   |  | 8  |
| 1.10. Thru-Earth Train ( <i>Stony Brook, Boston (a), Wisconsin-</i><br><i>Madison (a)</i> ).....          |  | 8  |
| 1.11. String Oscillations ( <i>Moscow Phys-Tech</i> ).....  |  | 9  |
| 1.12. Hovering Helicopter ( <i>Moscow Phys-Tech</i> ).....  |  | 9  |
| 1.13. Astronaut Tether ( <i>Moscow Phys-Tech, Michigan</i> ) .....  |  | 9  |
| 1.14. Spiral Orbit ( <i>MIT</i> ) .....   |  | 10 |
| 1.15. Central Force with Origin on Circle ( <i>MIT, Michigan State</i> ) .....                            |  | 10 |
| 1.16. Central Force Orbit ( <i>Princeton</i> ) .....  |  | 10 |
| 1.17. Dumbbell Satellite ( <i>Maryland, MIT, Michigan State</i> ) .....                                   |  | 11 |
| 1.18. Yukawa Force Orbit ( <i>Stony Brook</i> ) .....   |  | 11 |
| 1.19. Particle Colliding with Reflecting Walls ( <i>Stanford</i> ).....                                   |  | 12 |
| 1.20. Earth-Comet Encounter ( <i>Princeton</i> ).....   |  | 12 |

|  |    |
|--|----|
| 1.21. Neutron Scattering ( <i>Moscow Phys-Tech</i> ).....  | 13 |
| 1.22. Collision of Mass–Spring System ( <i>MIT</i> ).....  | 13 |
| 1.23. Double Collision of Mass–Spring System ( <i>Moscow Phys-Tech</i> ).....                              | 13 |
| 1.24. Small Particle in Bowl ( <i>Stony Brook</i> ).....   | 14 |
| 1.25. Fast Particle in Bowl ( <i>Boston</i> ).....   | 14 |
| 1.26. Mass Orbiting on Table ( <i>Stony Brook, Princeton, Maryland, Michigan</i> ).....                    | 15 |
| 1.27. Falling Chimney ( <i>Boston, Chicago</i> ).....  | 16 |
| 1.28. Sliding Ladder ( <i>Princeton, Rutgers, Boston</i> ).....  | 16 |
| 1.29. Unwinding String ( <i>MIT, Maryland (a,b), Chicago (a,b)</i> ).....                                  | 17 |
| 1.30. Six Uniform Rods ( <i>Stony Brook</i> ).....   | 18 |
| 1.31. Period as Function of Energy ( <i>MIT</i> ).....   | 19 |
| 1.32. Rotating Pendulum ( <i>Princeton, Moscow Phys-Tech</i> ).....  | 19 |
| 1.33. Flyball Governor ( <i>Boston, Princeton, MIT</i> ).....  | 19 |
| 1.34. Double Pendulum ( <i>Stony Brook, Princeton, MIT</i> ).....  | 20 |
| 1.35. Triple Pendulum ( <i>Princeton</i> ).....  | 21 |
| 1.36. Three Masses and Three Springs on Hoop ( <i>Columbia, Stony Brook, MIT</i> ) .....                   | 21 |
| 1.37. Nonlinear Oscillator ( <i>Princeton</i> ).....   | 22 |
| 1.38. Swing ( <i>MIT, Moscow Phys-Tech</i> ).....  | 22 |
| 1.39. Rotating Door ( <i>Boston</i> ).....   | 22 |
| 1.40. Bug on Globe ( <i>Boston</i> ).....  | 23 |
| 1.41. Rolling Coin ( <i>Princeton, Stony Brook</i> ).....  | 24 |
| 1.42. Unstable Top ( <i>Stony Brook</i> ).....   | 24 |
| 1.43. Pendulum Clock in Noninertial Frame ( <i>Maryland</i> ).....   | 25 |
| 1.44. Beer Can ( <i>Princeton, Moscow Phys-Tech</i> ).....   | 26 |
| 1.45. Space Habitat Baseball ( <i>Princeton</i> ).....   | 27 |
| 1.46. Vibrating String with Mass ( <i>Stony Brook</i> ).....   | 27 |
| 1.47. Shallow Water Waves ( <i>Princeton (a,b)</i> ).....  | 28 |
| 1.48. Suspension Bridge ( <i>Stony Brook</i> ).....  | 29 |
| 1.49. Catenary ( <i>Stony Brook, MIT</i> ).....  | 29 |
| 1.50. Rotating Hollow Hoop ( <i>Boston</i> ).....  | 30 |
| 1.51. Particle in Magnetic Field ( <i>Stony Brook</i> ).....   | 31 |
| 1.52. Adiabatic Invariants ( <i>Boston (a)</i> ) and Dissolving Spring ( <i>Princeton, MIT (b)</i> ) ..... | 31 |
| 1.53. Superball in Weakening Gravitational Field ( <i>Michigan State</i> ).....                            | 32 |
| <br>   |    |
| 2. Relativity .....  | 33 |
| 2.1. Marking Sticks ( <i>Stony Brook</i> ).....  | 33 |
| 2.2. Rockets in Collision ( <i>Stony Brook</i> ).....  | 34 |

|   |    |
|---|----|
| 2.3. Photon Box ( <i>Stony Brook</i> ) .....  | 34 |
| 2.4. Cube's Apparent Rotation ( <i>Stanford, Moscow Phys-Tech</i> ).....  | 35 |
| 2.5. Relativistic Rocket ( <i>Rutgers</i> ).....  | 36 |
| 2.6. Rapidity ( <i>Moscow Phys-Tech</i> ) .....   | 36 |
| 2.7. Charge in Uniform Electric Field ( <i>Stony Brook, Maryland,</i><br><i>Colorado</i> ).....                     | 37 |
| 2.8. Charge in Electric Field and Flashing Satellites ( <i>Maryland</i> ).....                                      | 37 |
| 2.9. Uniformly Accelerated Motion ( <i>Stony Brook</i> ).....   | 38 |
| 2.10. Compton Scattering ( <i>Stony Brook, Michigan State</i> ).....  | 38 |
| 2.11. Mossbauer Effect ( <i>Moscow Phys-Tech, MIT, Colorado</i> ).....  | 39 |
| 2.12. Positronium and Relativistic Doppler Effect ( <i>Stony Brook</i> ).....                                       | 39 |
| 2.13. Transverse Relativistic Doppler Effect ( <i>Moscow Phys-Tech</i> ).....                                       | 39 |
| 2.14. Particle Creation ( <i>MIT</i> ).....   | 40 |
| 2.15. Electron–Electron Collision ( <i>Stony Brook</i> ).....   | 40 |
| 2.16. Inverse Compton Scattering ( <i>MIT, Maryland</i> ).....  | 40 |
| 2.17. Proton–Proton Collision ( <i>MIT</i> ).....   | 40 |
| 2.18. Pion Creation and Neutron Decay ( <i>Stony Brook</i> ).....   | 41 |
| 2.19. Elastic Collision and Rotation Angle ( <i>MIT</i> ).....  | 41 |
| <br>  |    |
| 3. Electrodynamics .....  | 43 |
| 3.1. Charge Distribution ( <i>Wisconsin-Madison</i> ).....  | 43 |
| 3.2. Electrostatic Forces and Scaling ( <i>Moscow Phys-Tech</i> ).....  | 43 |
| 3.3. Dipole Energy ( <i>MIT, Moscow Phys-Tech</i> ).....  | 44 |
| 3.4. Charged Conducting Sphere in Constant Electric Field ( <i>Stony</i><br><i>Brook, MIT</i> ).....                | 44 |
| 3.5. Charge and Conducting Sphere I ( <i>MIT</i> ).....   | 45 |
| 3.6. Charge and Conducting Sphere II ( <i>Boston</i> ).....   | 45 |
| 3.7. Conducting Cylinder and Line Charge ( <i>Stony Brook, Michigan</i><br><i>State</i> ).....                      | 46 |
| 3.8. Spherical Void in Dielectric ( <i>Princeton</i> ).....   | 46 |
| 3.9. Charge and Dielectric ( <i>Boston</i> ).....   | 47 |
| 3.10. Dielectric Cylinder in Uniform Electric Field ( <i>Princeton</i> ).....                                       | 47 |
| 3.11. Powder of Dielectric Spheres ( <i>Stony Brook</i> ).....  | 48 |
| 3.12. Concentric Spherical Capacitor ( <i>Stony Brook</i> ).....  | 48 |
| 3.13. Not-so-concentric Spherical Capacitor ( <i>Michigan Tech</i> ).....   | 49 |
| 3.14. Parallel Plate Capacitor with Solid Dielectric ( <i>Stony Brook,</i><br><i>Michigan Tech, Michigan</i> )..... | 49 |
| 3.15. Parallel Plate Capacitor in Dielectric Bath ( <i>MIT</i> ).....   | 50 |
| 3.16. Not-so-parallel Plate Capacitor ( <i>Princeton (a), Rutgers (b)</i> ).....                                    | 51 |
| 3.17. Cylindrical Capacitor in Dielectric Bath ( <i>Boston, Maryland</i> ).....                                     | 51 |

|  |    |
|--|----|
| 3.18. Iterated Capacitance ( <i>Stony Brook</i> ).....   | 52 |
| 3.19. Resistance vs. Capacitance ( <i>Boston, Rutgers (a)</i> ).....                               | 52 |
| 3.20. Charge Distribution in Inhomogeneous Medium ( <i>Boston</i> ).....                           | 53 |
| 3.21. Green's Reciprocation Theorem ( <i>Stony Brook</i> ).....                                    | 54 |
| 3.22. Coaxial Cable and Surface Charge ( <i>Princeton</i> ).....                                   | 54 |
| 3.23. Potential of Charged Rod ( <i>Stony Brook</i> ).....   | 55 |
| 3.24. Principle of Conformal Mapping ( <i>Boston</i> ).....  | 56 |
| 3.25. Potential above Half Planes ( <i>Princeton</i> ).....  | 56 |
| 3.26. Potential of Halved Cylinder ( <i>Boston, Princeton, Chicago</i> ).....                      | 56 |
| 3.27. Resistance of a Washer ( <i>MIT</i> ).....   | 57 |
| 3.28. Spherical Resistor ( <i>Michigan State</i> ).....  | 57 |
| 3.29. Infinite Resistor Ladder ( <i>Moscow Phys-Tech</i> ).....                                    | 58 |
| 3.30. Semi-infinite Plate ( <i>Moscow Phys-Tech</i> ).....   | 59 |
| 3.31. Magnetic Field in Center of Cube ( <i>Moscow Phys-Tech</i> ).....                            | 59 |
| 3.32. Magnetic Dipole and Permeable Medium ( <i>Princeton</i> ).....                               | 60 |
| 3.33. Magnetic Shielding ( <i>Princeton</i> ).....   | 60 |
| 3.34. Electromotive Force in Spiral ( <i>Moscow Phys-Tech</i> ).....                               | 60 |
| 3.35. Sliding Copper Rod ( <i>Stony Brook, Moscow Phys-Tech</i> ).....                             | 61 |
| 3.36. Loop in Magnetic Field ( <i>Moscow Phys-Tech, MIT</i> ).....                                 | 61 |
| 3.37. Conducting Sphere in Constant Magnetic Field ( <i>Boston</i> ).....                          | 62 |
| 3.38. Mutual Inductance of Line and Circle ( <i>Michigan</i> ).....                                | 62 |
| 3.39. Faraday's Homopolar Generator ( <i>Stony Brook, Michigan</i> ).....                          | 62 |
| 3.40. Current in Wire and Poynting Vector ( <i>Stony Brook, MIT</i> ).....                         | 63 |
| 3.41. Box and Impulsive Magnetic Field ( <i>Boston</i> ).....                                      | 63 |
| 3.42. Coaxial Cable and Poynting Vector ( <i>Rutgers</i> ).....                                    | 64 |
| 3.43. Angular Momentum of Electromagnetic Field ( <i>Princeton</i> ).....                          | 65 |
| 3.44. Plane Wave in Dielectric ( <i>Stony Brook, Michigan</i> ).....                               | 65 |
| 3.45. X-Ray Mirror ( <i>Princeton</i> ).....   | 66 |
| 3.46. Plane Wave in Metal ( <i>Colorado, MIT</i> ).....  | 67 |
| 3.47. Wave Attenuation ( <i>Stony Brook</i> ).....   | 67 |
| 3.48. Electrons and Circularly Polarized Waves ( <i>Boston</i> ).....                              | 67 |
| 3.49. Classical Atomic Spectral Line ( <i>Princeton, Wisconsin-Madison</i> ).....                  | 68 |
| 3.50. Lifetime of Classical Atom ( <i>MIT, Princeton, Stony Brook</i> ).....                       | 69 |
| 3.51. Lorentz Transformation of Fields ( <i>Stony Brook</i> ).....                                 | 69 |
| 3.52. Field of a Moving Charge ( <i>Stony Brook</i> ).....   | 70 |
| 3.53. Retarded Potential of Moving Line Charge ( <i>MIT</i> ).....                                 | 70 |
| 3.54. Orbiting Charges and Multipole Radiation ( <i>Princeton, Michigan State, Maryland</i> )..... | 71 |
| 3.55. Electron and Radiation Reaction ( <i>Boston</i> ).....                                       | 72 |
| 3.56. Radiation of Accelerating Positron ( <i>Princeton, Colorado</i> ).....                       | 72 |
| 3.57. Half-Wave Antenna ( <i>Boston</i> ).....   | 73 |
| 3.58. Čerenkov Radiation ( <i>Stony Brook</i> ).....   | 73 |

3.59. Stability of Plasma (*Boston*)..... 74

3.60. Charged Particle in Uniform Magnetic Field (*Princeton*)..... 74

3.61. Lowest Mode of Rectangular Wave Guide (*Princeton, MIT, Michigan State*)..... 74

3.62. TM Modes in Rectangular Wave Guide (*Princeton*)..... 75

3.63. Betatron (*Princeton, Moscow Phys-Tech, Colorado, Stony Brook (a)*)..... 75

3.64. Superconducting Frame in Magnetic Field (*Moscow Phys-Tech*)..... 76

3.65. Superconducting Sphere in Magnetic Field (*Michigan State, Moscow Phys-Tech*)..... 77

3.66. London Penetration Depth (*Moscow Phys-Tech*)..... 77

3.67. Thin Superconducting Plate in Magnetic Field (*Stony Brook*)..... 78

PART II: SOLUTIONS

I. Mechanics ..... 81

1.1. Falling Chain (*MIT, Stanford*)..... 81

1.2. Cat and Mouse Tug of War (*Moscow Phys-Tech, MIT*)..... 81

1.3. Cube Bouncing off Wall (*Moscow Phys-Tech*)..... 82

1.4. Cue-struck Billiard Ball (*Rutgers, Moscow Phys-Tech, Wisconsin-Madison (a)*)..... 84

1.5. Stability on Rotating Rollers (*Princeton*)..... 86

1.6. Swan and Crawfish (*Moscow Phys-Tech*)..... 88

1.7. Mud from Tire (*Stony Brook*)..... 90

1.8. Car down Ramp up Loop (*Stony Brook*)..... 92

1.9. Pulling Strings (*MIT*)..... 94

1.10. Thru-Earth Train (*Stony Brook, Boston (a), Wisconsin-Madison (a)*) 95

1.11. String Oscillations (*Moscow Phys-Tech*)..... 97

1.12. Hovering Helicopter (*Moscow Phys-Tech*)..... 98

1.13. Astronaut Tether (*Moscow Phys-Tech, Michigan*)..... 99

1.14. Spiral Orbit (*MIT*)..... 100

1.15. Central Force with Origin on Circle (*MIT, Michigan State*)..... 101

1.16. Central Force Orbit (*Princeton*)..... 102

1.17. Dumbbell Satellite (*Maryland, MIT, Michigan State*)..... 104

1.18. Yukawa Force Orbit (*Stony Brook*)..... 106

1.19. Particle Colliding with Reflecting Walls (*Stanford*)..... 107

1.20. Earth-Comet Encounter (*Princeton*)..... 109

1.21. Neutron Scattering (*Moscow Phys-Tech*)..... 110

|  |     |
|--|-----|
| 1.22. Collision of Mass–Spring System ( <i>MIT</i> ).....  | 111 |
| 1.23. Double Collision of Mass–Spring System ( <i>Moscow Phys-Tech</i> ).....                            | 112 |
| 1.24. Small Particle in Bowl ( <i>Stony Brook</i> ).....   | 114 |
| 1.25. Fast Particle in Bowl ( <i>Boston</i> ).....   | 117 |
| 1.26. Mass Orbiting on Table ( <i>Stony Brook, Princeton, Maryland, Michigan</i> ).....                  | 118 |
| 1.27. Falling Chimney ( <i>Boston, Chicago</i> ).....  | 119 |
| 1.28. Sliding Ladder ( <i>Princeton, Rutgers, Boston</i> ).....  | 120 |
| 1.29. Unwinding String ( <i>MIT, Maryland(a,b), Chicago(a,b)</i> ).....                                  | 122 |
| 1.30. Six Uniform Rods ( <i>Stony Brook</i> ).....   | 125 |
| 1.31. Period as Function of Energy ( <i>MIT</i> ).....   | 128 |
| 1.32. Rotating Pendulum ( <i>Princeton, Moscow Phys-Tech</i> ).....                                      | 129 |
| 1.33. Flyball Governor ( <i>Boston, Princeton, MIT</i> ).....  | 131 |
| 1.34. Double Pendulum ( <i>Stony Brook, Princeton, MIT</i> ).....  | 133 |
| 1.35. Triple Pendulum ( <i>Princeton</i> ).....  | 135 |
| 1.36. Three Masses and Three Springs on Hoop ( <i>Columbia, Stony Brook, MIT</i> ) .....                 | 137 |
| 1.37. Nonlinear Oscillator ( <i>Princeton</i> ).....   | 139 |
| 1.38. Swing ( <i>MIT, Moscow Phys-Tech</i> ).....  | 141 |
| 1.39. Rotating Door ( <i>Boston</i> ).....   | 142 |
| 1.40. Bug on Globe ( <i>Boston</i> ).....  | 143 |
| 1.41. Rolling Coin ( <i>Princeton, Stony Brook</i> ).....  | 145 |
| 1.42. Unstable Top ( <i>Stony Brook</i> ).....   | 147 |
| 1.43. Pendulum Clock in Noninertial Frame ( <i>Maryland</i> ).....                                       | 148 |
| 1.44. Beer Can ( <i>Princeton, Moscow Phys-Tech</i> ).....   | 149 |
| 1.45. Space Habitat Baseball ( <i>Princeton</i> ).....   | 153 |
| 1.46. Vibrating String with Mass ( <i>Stony Brook</i> ).....   | 154 |
| 1.47. Shallow Water Waves ( <i>Princeton(a,b)</i> ).....   | 157 |
| 1.48. Suspension Bridge ( <i>Stony Brook</i> ).....  | 160 |
| 1.49. Catenary ( <i>Stony Brook, MIT</i> ).....  | 161 |

| 3.19. Resistance vs. Capacitance ( <i>Boston, Rutgers (a)</i> ).....                               | 231 |
| 3.20. Charge Distribution in Inhomogeneous Medium ( <i>Boston</i> ).....                           | 233 |
| 3.21. Green's Reciprocation Theorem ( <i>Stony Brook</i> ).....                                    | 234 |
| 3.22. Coaxial Cable and Surface Charge ( <i>Princeton</i> ).....                                   | 235 |
| 3.23. Potential of Charged Rod ( <i>Stony Brook</i> ).....   | 237 |
| 3.24. Principle of Conformal Mapping ( <i>Boston</i> ).....  | 238 |
| 3.25. Potential above Half Planes ( <i>Princeton</i> ).....  | 240 |
| 3.26. Potential of Halved Cylinder ( <i>Boston, Princeton, Chicago</i> ).....                      | 241 |
| 3.27. Resistance of a Washer ( <i>MIT</i> ).....   | 243 |
| 3.28. Spherical Resistor ( <i>Michigan State</i> ).....  | 244 |
| 3.29. Infinite Resistor Ladder ( <i>Moscow Phys-Tech</i> ).....                                    | 245 |
| 3.30. Semi-infinite Plate ( <i>Moscow Phys-Tech</i> ).....   | 246 |
| 3.31. Magnetic Field in Center of Cube ( <i>Moscow Phys-Tech</i> ).....                            | 247 |
| 3.32. Magnetic Dipole and Permeable Medium ( <i>Princeton</i> ).....                               | 248 |
| 3.33. Magnetic Shielding ( <i>Princeton</i> ).....   | 250 |
| 3.34. Electromotive Force in Spiral ( <i>Moscow Phys-Tech</i> ).....                               | 252 |
| 3.35. Sliding Copper Rod ( <i>Stony Brook, Moscow Phys-Tech</i> ).....                             | 252 |
| 3.36. Loop in Magnetic Field ( <i>Moscow Phys-Tech, MIT</i> ).....                                 | 254 |
| 3.37. Conducting Sphere in Constant Magnetic Field ( <i>Boston</i> ).....                          | 255 |
| 3.38. Mutual Inductance of Line and Circle ( <i>Michigan</i> ).....                                | 256 |
| 3.39. Faraday's Homopolar Generator ( <i>Stony Brook, Michigan</i> ).....                          | 257 |
| 3.40. Current in Wire and Poynting Vector ( <i>Stony Brook, MIT</i> ).....                         | 258 |
| 3.41. Box and Impulsive Magnetic Field ( <i>Boston</i> ).....                                      | 259 |
| 3.42. Coaxial Cable and Poynting Vector ( <i>Rutgers</i> ).....                                    | 260 |
| 3.43. Angular Momentum of Electromagnetic Field ( <i>Princeton</i> ).....                          | 263 |
| 3.44. Plane Wave in Dielectric ( <i>Stony Brook, Michigan</i> ).....                               | 265 |
| 3.45. X-Ray Mirror ( <i>Princeton</i> ).....   | 267 |
| 3.46. Plane Wave in Metal ( <i>Colorado, MIT</i> ).....  | 268 |
| 3.47. Wave Attenuation ( <i>Stony Brook</i> ).....   | 271 |
| 3.48. Electrons and Circularly Polarized Waves ( <i>Boston</i> ).....                              | 273 |
| 3.49. Classical Atomic Spectral Line ( <i>Princeton, Wisconsin-Madison</i> ).....                  | 274 |
| 3.50. Lifetime of Classical Atom ( <i>MIT, Princeton, Stony Brook</i> ).....                       | 277 |
| 3.51. Lorentz Transformation of Fields ( <i>Stony Brook</i> ).....                                 | 278 |
| 3.52. Field of a Moving Charge ( <i>Stony Brook</i> ).....   | 280 |
| 3.53. Retarded Potential of Moving Line Charge ( <i>MIT</i> ).....                                 | 281 |
| 3.54. Orbiting Charges and Multipole Radiation ( <i>Princeton, Michigan State, Maryland</i> )..... | 283 |
| 3.55. Electron and Radiation Reaction ( <i>Boston</i> ).....                                       | 285 |
| 3.56. Radiation of Accelerating Positron ( <i>Princeton, Colorado</i> ).....                       | 287 |
| 3.57. Half-Wave Antenna ( <i>Boston</i> ).....   | 288 |
| 3.58. Cerenkov Radiation ( <i>Stony Brook</i> ).....   | 290 |
| 3.59. Stability of Plasma ( <i>Boston</i> ).....   | 292 |

|   |     |
|---|-----|
| 3.60. Charged Particle in Uniform Magnetic Field ( <i>Princeton</i> ).....                      | 293 |
| 3.61. Lowest Mode of Rectangular Wave Guide ( <i>Princeton, MIT, Michigan State</i> ).....      | 294 |
| 3.62. TM Modes in Rectangular Wave Guide ( <i>Princeton</i> ).....                              | 297 |
| 3.63. Betatron ( <i>Princeton, Moscow Phys-Tech, Colorado, Stony Brook (a)</i> ).....           | 299 |
| 3.64. Superconducting Frame in Magnetic Field ( <i>Moscow Phys-Tech</i> ).....                  | 303 |
| 3.65. Superconducting Sphere in Magnetic Field ( <i>Michigan State, Moscow Phys-Tech</i> )..... | 305 |
| 3.66. London Penetration Depth ( <i>Moscow Phys-Tech</i> ).....                                 | 306 |
| 3.67. Thin Superconducting Plate in Magnetic Field ( <i>Stony Brook</i> ).....                  | 308 |

### PART III: APPENDIXES

|  |     |
|--|-----|
| Approximate Values of Physical Constants.....                  | 313 |
| Some Astronomical Data .....                                   | 314 |
| Other Commonly Used Units.....                                 | 314 |
| Conversion Table from Rationalized MKSA to Gaussian Units..... | 315 |
| Vector Identities.....   | 316 |
| Vector Formulas in Spherical and Cylindrical Coordinates.....  | 317 |
| Legendre Polynomials.....                                      | 320 |
| Rodrigues' Formula.....  | 321 |
| Spherical Harmonics .....                                      | 321 |
| <br>   |     |
| BIBLIOGRAPHY.....  | 323 |
